 REPLACEMENT  
 SURGERY  
 ACROSS INDIA.

**Information for Surgeons and Hospitals**

The Indian Joint Registry (IJR) is an initiative run by the Indian Society of Hip and Knee Surgeons (ISHKS) in the interests of patients.

Thousands of hip and knee replacement procedures are undertaken in India every year, bringing great benefit to many patients. The success of these procedures has resulted in

greater numbers being undertaken each year.

IJR collects information on patients undergoing hip and knee replacement in India, to monitor performance of implants, to assure high standards of care, and to further research into best practice.

Recording, monitoring and tracking patient outcomes following joint replacement is essential, providing independent evidence on implant performance, and supporting orthopaedic research. The IJR is delivered through a contract with NEC Software Solutions UK Limited (NEC). NEC is a Global organisation. They are orthopaedic registry experts, delivering the National Joint Registry (NJR) in the UK, the world's largest joint registry.

## How does IJR work?

## Benefits

## Security and Confidentiality

### Patient Confidentiality

Patient's identifiable data will not be disclosed. The IJR Patient Information Leaflet lays out how IJR data shall be used.

### Surgeon and Hospital Confidentiality

Surgeon and hospital level data will only be available to the individual participating surgeon, or the nominated hospital user. This is laid out in the IJR Privacy Statement, which details how data will be used, and the protections in place around surgeon and hospital confidentiality.

### Data Security

Data is stored by NEC Software Solutions UK Limited and is subject to strict security and confidentiality standards associated with patient identifiable information.

## Getting Involved

1

Participating in the IJR is quick, easy and free.

2

Visit our website to register your interest at [www.indianjointregistry.in](http://www.indianjointregistry.in)

3

You don't have to be a member of ISHKS; however, we encourage you to be a member for additional benefits.

4

You will be guided through how to get started, given details of the forms to use and training on the IJR systems.

5

The IJR patient information leaflet will inform your patients of the benefits of IJR.
